## DIAGNOSTIC STEWARDSHIP: THE FUTURE OF ANTIMICROBIAL THERAPY- ROLE OF NURSES

**NOVEMBER 21-22, 2022**  
**(1.30 PM-5.30 PM)**

Diagnostic stewardship is a key component of antimicrobial stewardship as rational use of antimicrobials requires rapid and correct diagnosis. This program intends to build a cohort of trained healthcare providers capable of appropriate specimen collection, ordering of correct tests and interpretation of reports towards clinical management and infection prevention and control

## COURSE DETAILS

### Contents

- Role of diagnostic stewardship in combating AMR
- Pre-analytical requisites for microbiological testing
- Choosing the correct microbiological tests for rapid, early & accurate diagnosis
- Interpretation of culture and AST reports, Critical alerts
- MIC, Breakpoints, PK and PD

### Highlights

- Multi- disciplinary renowned faculty
- Interactive modular course
- Informative Case studies
- Insights from experiences & challenges

### Outcome

- Requisite skills for combating antimicrobial resistance
- Leadership for diagnostic stewardship
